

Regional historical trends in CPI 2012-2017

Transparency International released their Corruption Perceptions Index 2017 on 22 February 2018. Whilst **historical trends in CPI index scores for 2012-2017** for each country are also presented, the 2012-2017 historical scores have not been separately presented on a **regional basis** to allow a quick comparison of country [corruption](#) scores within each of the six regions used in the analysis (Americas, Asia Pacific, Eastern Europe & Central Asia, MENA, Sub-Saharan Africa and Western Europe).

We have reorganised the spreadsheet provided by Transparency International to provide a listing of the **reported historical trends in index scores for 2012-2017 for countries** in each of the six regions. Our spreadsheet is available [here](#).
