# Regional historical trends in CPI 2012-2017

Transparency International released their Corruption Perceptions Index 2017 on 22 February 2018. Whilst historical trends in CPI index scores for 2012-2017 for each country are also presented, the 2012-2017 historical scores have not been separately presented on a regional basis to allow a quick comparison of country corruption scores within each of the six regions used in the analysis (Americas, Asia Pacific, Eastern Europe & Central Asia, MENA, Sub-Saharan Africa and Western Europe).

We have reorganised the spreadsheet provided by Transparency International to provide a listing of the **reported historical trends in index scores for 2012-2017 for countries** in each of the six regions. Our spreadsheet is available <a href="here">here</a>.

## Doing Business 2015 Sub-Saharan Africa

## Read Doing Business 2015

#### Sub-Saharan Africa

Read the <u>Doing Business 2015 regional profile for Sub-Saharan Africa</u>. Learn how easy or difficult it is for local entrepreneurs to establish and run small to medium-size businesses when complying with relevant regulations.

The quality of public financial management (PFM) in business regulatory agencies inevitably impacts on their operational performance which in turn impacts on entrepreneurs.
